Education

Pondicherry University

Master of Computer Application (8.47 CGPA)

Nov. 2022 – June 2024

Kalapet, Puducherry

T.P.S College

Bachelor of Computer Applications (BCA) (71.625% Honours)

Aug. 2018 – Oct. 2021

Patna, Bihar

Work Experience

Indian Institute of Science Education and Research (IISER) Bhopal

Project Associate, Data Science Department

Jan. 2025 – Present

Bhopal, Madhya Pradesh

- Conducting cutting-edge research in data science, focusing on the development of an Emergency Vehicle Response System. Leveraging advanced machine learning and deep learning techniques to enable real-time data analysis and predictive modeling for optimizing emergency response workflows. Leading the design, training, and deployment of robust models integrating Convolutional Neural Networks (CNNs) and transfer learning, collaborating with multidisciplinary teams to address critical societal challenges through innovative, data-driven solutions.

Bharat Intern

Machine Learning Model Development | Jupyter Notebook, Python, Pandas, Matplotlib, Seaborn, Git

Aug. 2023 – Sep. 2023

Remote

- Developed machine learning models for predictive analytics, utilizing regression and classification techniques across diverse datasets. Enhanced model performance through data preprocessing and visualization, contributing to efficient project deliverables. [\[GitHub\]](#)

Freelance Project Developer & Academic Project Consultant

Self-Employed

Oct. 2021 – Sep. 2022

Remote — Patna, Bihar, India

- Delivered multiple academic software projects for computer science students, including chat applications, library management systems, and ML-based apps like used car price prediction.
- Provided complete end-to-end solutions including code, documentation, and deployment support.
- Tech Stack: Python, Java, PHP, MySQL, Streamlit, scikit-learn

Projects

Mango Blossom Diseases Detection | Python, TensorFlow, VGG16, ResNet50, Android Studio

2025

- Designed a deep learning-based solution using CNNs to classify mango blossom diseases (Anthracnose, Bacterial Blight, Powdery Mildew, Healthy) from a dataset of 1000 annotated images. Applied transfer learning with VGG16 and ResNet50, augmented data with rotation and zoom, and deployed the model into an Android app for real-time farmer diagnostics, achieving high accuracy and precision.

Attendance Management System Using Face Recognition | OpenCV, LBPH, HaarCascade Classifier, MySQL

2024

- Developed an automated attendance system using face recognition, detecting student faces from live classroom video streams to mark attendance efficiently. Integrated OpenCV, LBPH for feature extraction, HaarCascade for face detection, and MySQL for data management. [\[Link\]](#)

College Management App | Android Studio, Java, Firebase, XML

2021

- Built an Android application with user authentication to manage college resources, featuring notifications, eBook access, event galleries, and YouTube lecture integration, enhanced with Glide and Material UI for a modern interface.

Publications

Efficient Face Recognition-Based Attendance System with Adaptive Lighting and Pose Normalization, ICIVC 2025. (Accepted, Presentation scheduled for 13th June 2025)

Deep Learning Based Approach to Quantify the Emergency Vehicle Accessibility in Urban Areas Using LiDAR and Images, Patent Submitted, 2025.

SFLCDApp: Simulated Federated Learning for Crop Disease Detection Using Lightweight CNN Models on Android Devices, Pending for Copyright Registration.

Technical Skills

Languages: Python, C, C++, Java, SQL, HTML, CSS, JavaScript (Basic)

Technologies: Machine Learning, Deep Learning, Android Development

Developer Tools: TensorFlow, OpenCV, Scikit-Learn, MySQL, Firebase, Android Studio, Git

Certifications & Achievements

GATE Qualified in Data Science and Artificial Intelligence (DA) (2024)

UGC NET (Assistant Professor) in Computer Science and Applications (2024)

NPTEL Certification in Data Analytics with Python, IIT Roorkee (Jan 2023) - 69% [\[Link\]](#)

GeeksForGeeks: Solved 485+ problems, University Coding Ranking - 2 [\[Link\]](#)

Hackerrank: Gold Badge (5*) in C, C++, Python, and Java [\[Link\]](#)

Artificial Intelligence Primer Certification - Infosys [\[Link\]](#)

Interests

Chess, Music, Reading Books
